2019-2020 Yellowstone County Community Health Needs Assessment (CHNA)

Quick Facts

What is the CHNA?

A CHNA (or Community Health Needs Assessment) is…

- A large snapshot or report of our county’s health
- A general report on more than a dozen health topics
- A tool for helping local leaders and organizations decide how to better serve the people who live, work, play, learn, and pray in Yellowstone County
- Available to anyone and everyone to use!

How does a CHNA happen?

Our local CHNA is...

- Collected every 3 years
- Currently sponsored by Billings Clinic, RiverStone Health, and St. Vincent Healthcare
- Includes information from:
  - More than 150 local leaders
  - Phone surveys of 400 residents
  - State and national reports
  - 400+ photos and comments from a web-based tool called Streetwyze (new this year!)
- Overseen by a team of local leaders and residents to make sure the CHNA is as accurate and useful as possible

Why does a CHNA matter?

A community-wide CHNA helps us...

- Better understand what current issues are most important for our community
- Keep an eye on health issues over time - what is getting better, what is getting worse, what new issues exist, and what is staying the same
- Check to see how well existing efforts are working
- Make decisions about what issues to tackle together as a community
