

2025-2026 YELLOWSTONE COUNTY COMMUNITY HEALTH NEEDS ASSESSMENT (CHNA) QUICK FACTS

WHAT IS THE CHNA?

A CHNA (or Community Health Needs Assessment) is...

- A large snapshot or report of our county's health
- A general report on more than a dozen health topics
- A tool for helping local leaders and organizations decide how to better serve the people who live, work, and play, learn and pray in Yellowstone County
- Available to anyone and everyone to use!

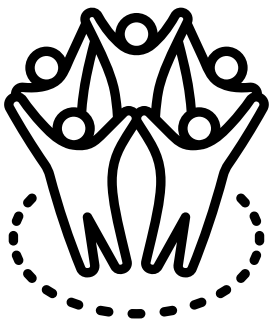

HOW DOES A CHNA HAPPEN?

Our local CHNA is...

- Collected every 3 years
- Currently sponsored by Billings Clinic, Riverstone Health, and Intermountain Health St. Vincent Regional Hospital
- Includes information from:
 - More than 150 local leaders
 - Phone surveys of 700 residents
- Overseen by a team of local leaders and residents to make sure the CHNA is as accurate and useful as possible

WHY DOES A CHNA MATTER?

A community-wide CHNA help us...

- Better understand what issues are most important for our community right now
- Keep an eye on health issues over time- what is getting better, what is getting worse, what new issues exist, and what is staying the same
- Check to see how well existing efforts are working
- Make decisions about what issues to tackle and together as a community
